

Authoring reference for Pelican YAML metadata, thought evolution lifecycles, authorship boundaries, and semantic layout styling.

1. Thought Evolution Lifecycle (Stage Transitions)

Posts are living thoughts. They progress across stages over time using the evolution: audit log.

2. Authorship & Origin Boundary

Strictly distinguishes Jim's primary creations from reviews and curations where external work is the primary subject.

3. Standard Pelican YAML Frontmatter Template

```
---
title: "Cordoba Stage Classical Guitar Setup"
slug: "cordoba-stage-guitar"
date: 2026-03-24
modified: 2026-09-09

# 1. Primary Classification (The 12 Core Domains)
category: Music           # Music, Software, Health, Making, Art, Law,
                          # Politics, Data, Exercise, Anatomy, Engineering

# 2. Multi-Label Topics & Keywords
tags: [guitar, classical, pickups, acoustic-resonance]

# 3. Publishing Control & Summary Teaser
status: published         # published | draft | hidden
summary: "Evaluation and setup adjustments for nylon string tone."

# 4. Thought Evolution & Authorship
origin: original          # original | study | review | curation
stage: project            # idea | til | rant | inquiry | project | app | article
evolution: "2026-03-24:idea > 2026-06-10:inquiry > 2026-09-09:project"

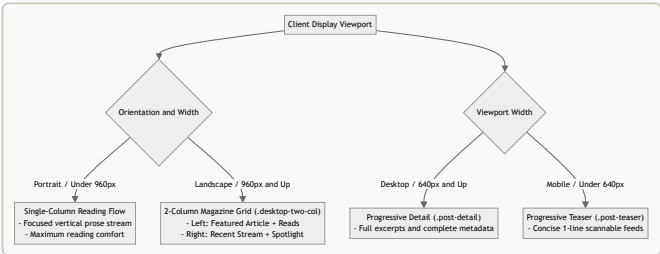

# 5. Interactive Media & Apps (Optional)
app_url: ""               # e.g. /apps/circle-of-fifths/
gallery_url: ""           # e.g. Google Photos album URL
---
```

Field	Type / Enum	Behavior in Pelican
category	Single enum	Routes to <code>lanes/{slug}.html</code> category feed.
tags	YAML list	Multi-label cross-category indexing.
status	published / draft	draft builds locally but hides from live site.
summary	Text	Feeds teaser excerpt on index cards.
origin	original / review / curation	Renders origin badge & attribution styling.
stage	idea → project → article	Renders stage indicator on post header.
evolution	History string	Displays thought evolution timeline.
app_url	URL path	Links companion post to live interactive app.

4. Markdown Syntax to Semantic CSS Component Mapping

Component	Markdown / HTML Syntax	CSS Selector	Visual & Typography Behavior
Site Header	Template-generated	.site-header , .site-nav	Clean branding, active page highlight, and zero-JS accessibility controls.
Lead Summary	<div class="page-intro">...</div>	.page-intro	Slightly larger type (1.15rem) with generous margins for article ledes.
Headings (H2-H4)	## Section , ### Sub	h2 , h3 , h4	Proportional margins, distinct serif/sans hierarchy, and clear section breaks.
Body Prose	Standard markdown paragraphs	p , main p	Readable measure capped at max-width: 76ch with 1.65 line-height.
Quotes & Callouts	> Quote / mental model	blockquote	Rust accent left border (3px solid var(--accent)), italicized, indented.
Photo Figures	![Caption](images/photo.jpg)	figure , figcaption	Bordered photo card with centered italicized caption below.
Data Tables	Pipe table: Col 1 Col 2	table , th , td	Clean bordered table with shaded header row and horizontal row dividers.
Code Snippets	```python ... ```	pre , code , .highlight	Monospace block with card shading, dark mode support, and code syntax styles.
Dashboard Grid	<div class="dashboard-grid">	.dashboard-grid	Multi-column CSS Grid card layout for metrics, stats, and telemetry.

5. Responsive Layout & Orientation Rules

6. Zero-JS & Accessibility Standards

Feature	Implementation Method
Zero-JS Guarantee	100% pure HTML5 + CSS. 0 <script> tags, 0 cookies, 0 runtime dependencies.
Theme Switcher	Pure CSS body:has(#theme-toggle:checked) with OS dark mode fallback.
Contrast Switcher	Pure CSS body:has(#contrast-toggle:checked) & @media (prefers-contrast: more) (7:1+ AAA).
Text Size Switcher	Pure CSS body:has(#text-size-toggle:checked) with 100% relative zoom scaling.
Keyboard Navigation	Skip-to-content link, semantic ARIA landmarks, and 3px focus rings.
